

Welcome to HPE GreenLake

Jump on in

Get simplicity and complete flexibility with HPE GreenLake; a consumption-based solution that allows businesses to manage IT on their terms.

What is HPE GreenLake?

Feature	Benefit
A hybrid solution with the advantages of both public cloud and on-premise IT	It's simple, flexible, scalable, secure and controllable
A catalogue of pre-designed, end-to-end solutions delivered in a cloud-like consumption model	So users can scale up or down when required, and only pay for what they use
Organise and manage data on-premise and in the cloud	For flexibility and simplicity
Critical workloads still reside on-premise	For full control and security
Innovate business and scale IT systems as and when needed	To cut back on the expense of buying upfront
Only pay for what you consume	For a flexible, fair and transparent predictable cost

The three solutions that make up GreenLake

GreenLake Flex Capacity

A scalable infrastructure service that allows scalability as and when needed, with pay-as-you-use metered usage.

HPE Pointnext

Allows users to choose infrastructure based on their environment. Pointnext experts design, implement and help manage your solution.

GreenLake Central

A self-service dashboard which allows users to purchase, manage and optimise their IT all from one place.

Why choose Tech Data for HPE GreenLake?

- StreamOne offers access to other cloud solutions including AWS, Azure and Google
- Higher ROI passing from Tech Data, to partners to end users
- Tech-as-a-Service providing access to a range of Tech Data Services on a pay-per-month basis
